

Durham City Green Corridor

A partnership project between:

Update for the Environment and Sustainable Communities Overview and Scrutiny Committee
March 2024

85% of the UK population live in towns and cities. This is expected to grow to **over 90%** by 2030.

99,400 people live in the City of Durham.

Almost a **quarter** have no cars or vans in the household.

One third of people in England do not have access to good quality green and blue space within 15 minutes of their home.

The quality, amount and variety of green spaces is seen by the public to be unequal both across the North in general and within individual towns and cities.

People in the UK made 855 million fewer outdoor recreation visits in 2022 v. 2020, citing poor health and busy schedules as barriers.

An estimated 1.1 million fewer people across the UK gained health benefits from spending time in nature in 2022 compared with two years earlier.

The countryside around towns, or the 'rural urban fringe' is the part of the rural landscape most familiar to people who live in cities, towns and villages.

It is also the part of the landscape most subject to pressures for development, access and recreation.

“ Green
Space
& fresh
air
for all. ”

Octavia Hill, National Trust Founder

Green corridor

“A large corridor, lung, web or wedge of land within or very close to towns and cities, that gives people easy access to nature-rich outdoor space that through investment and management will deliver significant new public and environmental benefit.”

A green corridor provides green infrastructure: a network of multi-functional green and blue spaces and **corridors** that exist within and between cities, towns and villages.

Many things can make up a green corridor. This includes wildlife sites, woodland, cycle routes or even benches.

“

At the heart of communities will be **accessible green infrastructure**, not only **improving the quality of place** but people's **quality of life** and reducing health inequalities.

”

Spatial Vision for County Durham, adopted in 2020

Our Vision

From the Wear-carved peninsula where the monks chose to worship, to the surrounding communities formed from the riches underfoot, Durham is a place where nature, culture and heritage are inextricably linked.

**We want to make it easier for people to reconnect.
With nature. With the city. With each other.**

A scenic view of a river flowing through a wooded area. The trees are mostly bare, with some showing autumn colors like yellow and orange. The sky is a clear, pale blue. The river is in the foreground, with some rocks and grass visible. The overall scene is peaceful and natural.

Our Mission

We will work together with nature and communities to enhance this beautiful part of Durham City, to enable change and deliver wide benefit for those who visit, live and work here.

Our Objectives

1

Improve physical connectivity to and within the Durham City Green Corridor.

A vibrant garden scene featuring a stone path leading through a variety of flowers. In the foreground, there are bright red poppies and purple flowers. In the background, a butterfly is visible among more purple and orange flowers. The overall atmosphere is lush and colorful.

2

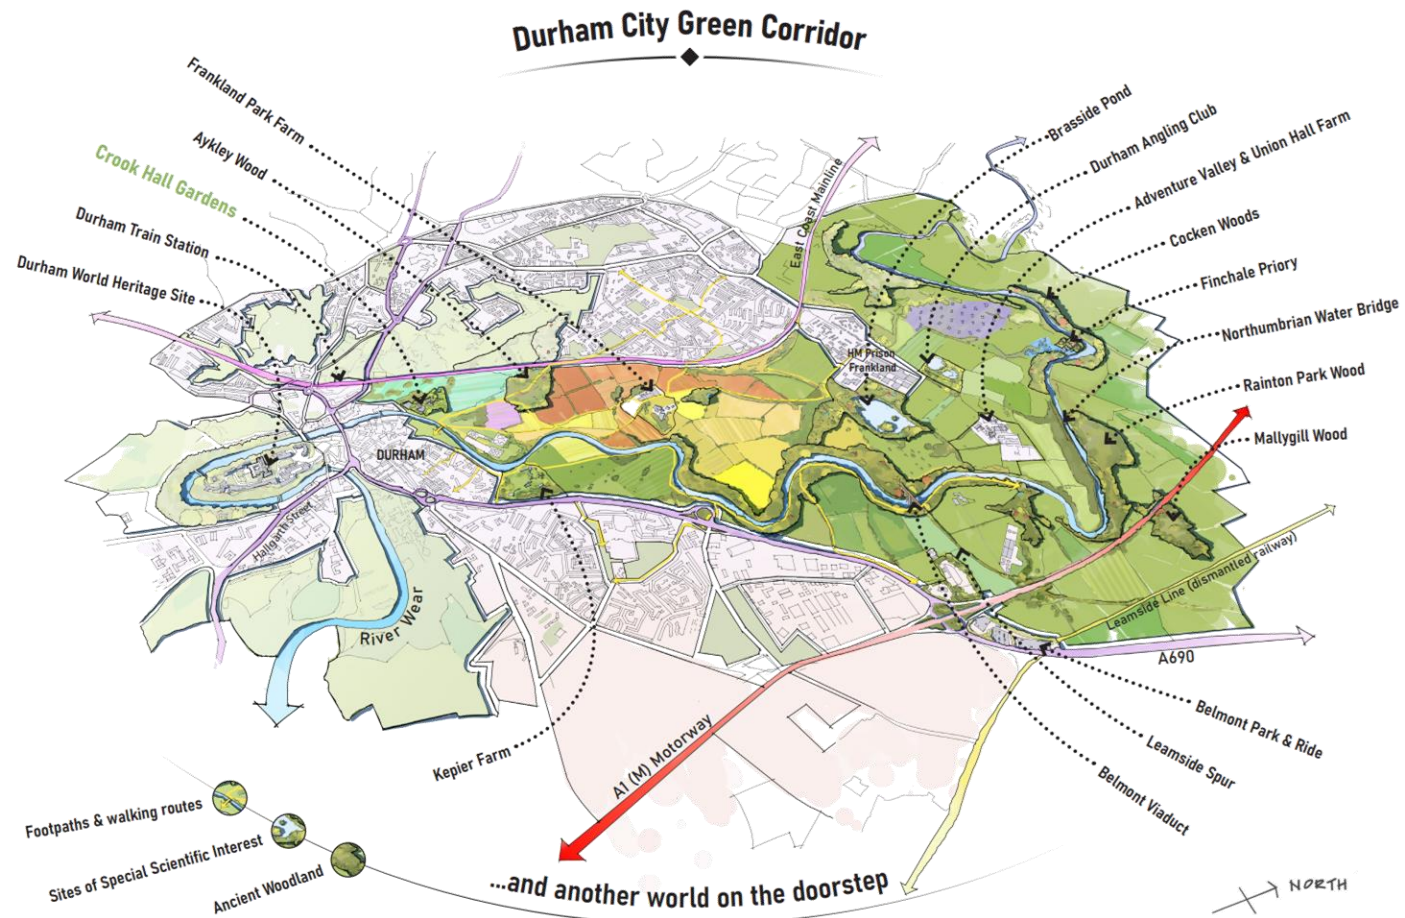

Develop practical actions with landowners and communities for greater biodiversity and climate action.

A stone path with green plants and flowers in the background. The path is made of large, flat, grey stones. On the left side, there are green plants with small pink flowers. On the right side, there are green plants with white and blue flowers. The background is slightly blurred, showing more greenery and a path leading into the distance.

3

Identify and deliver ways to connect people to nature and culture across Durham City and the green corridor.

Following a 6.5-mile stretch of the River Wear, this wedged green corridor connects Durham City and Crook Hall Gardens with over 1,000 hectares of green and blue space.

What benefits could this deliver for Durham?

Health and wellbeing

People and community

Challenges

Barriers to outdoor activity in Durham City

Connectivity of routes

Lack of clarity around rights of way

Lack of time

Safety

Challenges preventing green spaces from reaching their full potential in the North

Land use

Resources

Funding

‘I feel like there could be a bit more.’

‘Problem is I never know if I’m allowed to go to places...’

‘Neglected, abandoned area.’

‘For Durham, the river is important in terms of the impact upstream through urban environments from upland, then coast, is often missed. Green corridor and blue and green infrastructure are really important.’

Opportunities

People and place

Engaging and delivering for the community, supporting connectivity.

Nature and climate

Working in ways to protect and enhance nature and landscape.

Heritage

Celebrating and caring for the diversity of heritage in Durham City.
