

Audit Committee

28 February 2025

Agreement of Accounting Policies for Application in the 2024/25 Financial Statements

Ordinary Decision

Paul Darby, Corporate Director of Resources

Electoral division(s) affected:

None

Purpose of the Report

- 1 To update the Audit Committee on the County Council's accounting policies in the preparation of the 2024/25 Statement of Accounts.
- 2 To seek confirmation from the Audit Committee that appropriate policies are being applied at this stage.

Executive summary

- 3 The material accounting policies applied within the 2023/24 Statement of Accounts remain appropriate at this stage for the preparation of 2024/25 Statement of Accounts, with the exception of:
 - (a) 1.13 Leases, due to the mandatory implementation of IFRS 16 Leases in the 2024/25 CIPFA Code
 - (b) 1.15 Property, Plant and Equipment (excluding Highways Infrastructure Assets). A minor amendment to clarify de minimis levels has been included for 2024/25.
 - (c) 1.23 Schools. The reference to Foundation Trust schools has been removed, as the council no longer has such schools under its control.

- 4 Other CIPFA Code changes for 2024/25 are considered minor and there are no further accounting policies which require amendment as a result of changes in the Code.
- 5 The list of material accounting policies the council proposes to disclose at this stage in its Statement of Accounts notes are detailed in Appendix 2.

Recommendation

- 6 The Committee is recommended to:
 - (a) review the accounting policies and the amendments to 1.13 Leases, 1.15 Property, Plant and Equipment and 1.23 Schools outlined in Appendix 2;
 - (b) approve their use in the preparation of the 2024/25 financial statements;
 - (c) authorise the Corporate Director of Resources to review the accounting policies as necessary, including for materiality, and report any changes to the Audit Committee.

Background

- 7 In preparing the annual Statement of Accounts we closely follow CIPFA's Code of Practice for Local Authority Accounting in the UK (the Code), which is based upon approved accounting standards.
- 8 The Code is based on International Financial Reporting Standards (IFRS) and has been developed by the joint CIPFA/Local Authority (Scotland) Accounts Advisory Committee (LASAAC) Code Board overseen by the Financial Reporting Advisory Board. It is based on approved accounting standards issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee, except where these are inconsistent with specific statutory requirements.
- 9 The Code also draws on approved accounting standards issued by the International Public Sector Accounting Standards Board and the UK Financial Reporting Council where these provide additional guidance. The latest edition of the Code applies for accounting periods commencing on or after 1 April 2023. It supersedes the 2023/24 Code.
- 10 In England and Wales, the Code constitutes a 'proper accounting practice' under the terms of section 21(2) of the Local Government Act 2003.
- 11 The CIPFA/LASAAC Code Board, overseen by the Financial Reporting Advisory Board, is in a position to issue mid-year updates to the Code. This will only be done in exceptional circumstances.
- 12 It is a requirement of the Local Government Act 2003 and the Accounts and Audit (England) Regulations 2015 for the Statement of Accounts to be produced in accordance with proper accounting practices.
- 13 Accounting policies are defined in the Code as "the specific principles bases, conventions, rules and practices applied by an authority in preparing and presenting financial statements."
- 14 Accounting policies need not be applied if the effect of applying them would be immaterial. Materiality is defined in the Code as it applies to omissions and misstatements:

Omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the item, or a combination of both, could be the determining factor.

- 15 Objective 2 of the Audit Committee’s Terms of Reference requires it to provide ‘Independent assurance over the financial reporting of the council’s Statement of Accounts ensuring that any issues arising from the process of drawing up, auditing and certifying the council’s annual accounts are dealt with properly to maintain an understanding of accounting policies and internal and external reporting requirements’.

Main implications

- 16 The proposed material accounting policies are in line with those used within the 2023/24 accounts, with the exception of:
- (a) 1.13 Leases .The section where the council is a lessee has been amended following the mandatory implementation of IFRS 16 Leases in the 2024/25 CIPFA Code.
 - (b) 1.15 Property, Plant and Equipment (excluding Highways Infrastructure Assets). A minor amendment to clarify de minimis levels has been included.
 - (c) 1.23 Schools. A minor amendment to remove the reference to Foundation Trust schools, as the council no longer has such types of school under its control.
- 17 The other CIPFA Code changes for 2024/25 are considered minor and there are no further accounting policies which require amendment as a result of changes in the Code.

1.23.	Schools	Amended to remove Foundation Trust schools	✓
1.24.	Collection Fund Statement	No change	✓

1. Material Accounting Policies

1.1. General Principles

The Statement of Accounts summarises the council's financial performance for the 2024/25 financial year and its position at the year-end of 31 March 2025. The council is required by the Accounts and Audit Regulations 2015 to prepare an annual Statement of Accounts. In line with the Regulations, the Statement of Accounts is prepared in accordance with proper accounting practices.

Those practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2024/25 (the Code).

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

The Code requires that local authorities that can only be discontinued under statutory prescription shall prepare their financial statements on a going concern basis of accounting; that is, the accounts should be prepared on the assumption that the functions of the authority will continue in operational existence for the foreseeable future. Transfers of services under combinations of public sector bodies (such as local government reorganisation) do not negate the presumption that the financial statements shall be prepared on a going concern basis of accounting.

1.2. Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from contracts with service recipients, whether for services or the provision of goods, is recognised when (or as) the goods or services are transferred to the service recipient in accordance with the performance obligations in the contract.
- Supplies are recorded as expenditure when they are consumed - where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received, rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument, rather than the cash flows fixed or determined by the contract.

- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected. The council has a policy of not accruing for manual sundry creditor or sundry debtor provisions for less than £10,000, other than in exceptional circumstances.

1.3. Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value. In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the council's cash management.

1.4. Exceptional Items

When exceptional items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the Notes to the Accounts, depending on how significant the items are to an understanding of the council's financial performance.

1.5. Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or where the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless otherwise stated) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

1.6. Charges to Revenue for Non-Current Assets

Services, support services and trading accounts are debited with the following amounts to record the cost of holding non-current assets during the year:

- Depreciation attributable to the assets used by the relevant service.
- Revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off.
- Amortisation of intangible assets attributable to the service.

The council is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisations. However, it is required to make an annual contribution from revenue to reduce the overall borrowing requirement calculated by the council on a prudent basis and in accordance with statutory guidance. This annual contribution is known as the minimum revenue provision.

Therefore, so that council tax funds only what is required, the charges to the accounts (depreciation, revaluation and impairment losses and amortisations) are replaced by the minimum revenue provision with the difference being transferred to the Capital Adjustment Account in the Balance Sheet.

1.7. Employee Benefits

Benefits Payable During Employment

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees. These are recognised as an expense for services in the year in which employees render service to the council.

An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to revenue in the financial year in which the holiday absence occurs.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the council to terminate an officer's employment before the normal retirement date or an officer's

decision to accept voluntary redundancy in exchange for those benefits. These benefits are charged on an accruals basis to the Comprehensive Income and Expenditure Statement at the earlier of when the council can no longer withdraw the offer of those benefits or when the council recognises costs for restructuring.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund balance to be charged with the amount payable by the council to the Pension Fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits. These are replaced with debits for the cash paid to the Pension Fund and pensioners and any such amounts payable but unpaid at the year end.

Post-Employment Benefits

Employees of the council are members of three separate pension schemes:

- The Local Government Pension Scheme, administered by Durham County Council.
- The Teachers' Pension Scheme, administered by Capita Teachers' Pensions on behalf of the Department for Education (DfE).
- The NHS Pension Scheme, administered by the NHS Business Services Authority.

These schemes provide defined benefits to members (retirement lump sums and pensions), earned as employees worked for the council. However, the arrangements for the Teachers' and NHS schemes mean that liabilities for these benefits cannot ordinarily be identified specifically to the council. The schemes are therefore accounted for as if they were defined contribution schemes and no liability for future payments of benefits is recognised in the Balance Sheet.

The Children and Young People's Services line in the Comprehensive Income and Expenditure Statement is charged with the employer's contributions payable to Teachers' Pensions in the year. The Adult and Health Services line in the Comprehensive Income and Expenditure Statement is charged with the employer's contributions payable to the NHS Pension scheme in the year.

The Local Government Pension Scheme

The Local Government Scheme is accounted for as a defined benefits scheme:

- The liabilities of the Durham County Council Pension Fund attributable to the council are included in the Balance Sheet on an actuarial basis using the

projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc, and projections of projected earnings for current employees.

- Liabilities are discounted to their value at current prices, using a discount rate provided by the actuary.
- The assets of Durham County Council Pension Fund attributable to the council are included in the Balance Sheet at their fair value, which are determined as set out in the Pension Fund accounting policies later in this document.

The change in the net pensions liability is analysed into the following components:

- Service cost, comprising:
 - Current service cost – the increase in liabilities as a result of years of service earned this year – allocated in the Comprehensive Income and Expenditure Statement to the services for which the employees worked.
 - Past service cost – the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years – debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Corporate Costs.
 - Net interest on the net defined benefit liability (asset), i.e. net interest expense for the council – the change during the period in the net defined benefit liability (asset) that arises from the passage of time charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement. This is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability (asset) at the beginning of the period, taking into account any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payments. An amendment to IAS 19 requires that updated actuarial assumptions are used to remeasure the interest on the net defined benefit obligation (asset) for the remainder of the reporting period after special events, such as academy transfers (settlements). The council applies this where material.
 - Gains or losses on settlements and curtailments – the result of actions to relieve the council of liabilities or events that reduce the expected future service or accrual of benefits of employees – debited or credited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Corporate Costs.

Discretionary Benefits

The council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff (including teachers) are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

1.8. Events After the Reporting Period

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the end of the reporting period - the Statement of Accounts is adjusted to reflect such events.
- Those that are indicative of conditions that arose after the reporting period - the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

1.9. Financial Instruments

Financial Liabilities

Financial liabilities are recognised on the Balance Sheet when the council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and are carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

For most of the borrowings that the council has, this means that the amount presented in the Balance Sheet is the outstanding principal repayable (plus accrued interest); and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

Where premiums and discounts have been charged to the Comprehensive Income and Expenditure Statement, regulations allow the impact on the General Fund

balance to be spread over future years. The council has a policy of spreading the gain or loss over the term that was remaining on the loan against which the premium was payable or discount receivable when it was repaid. The reconciliation of amounts charged to the Comprehensive Income and Expenditure Statement to the net charge required against the General Fund balance is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

Financial Assets

Financial assets are classified using an approach that is based on the business model for holding the financial assets and their cashflow characteristics.

There are three main classes of financial assets measured at:

- amortised cost
- fair value through profit or loss (FVPL), and
- fair value through other comprehensive income (FVOCI)

The council holds most of its investments solely to collect contractual cash flows, which means that the majority of its financial assets are measured at amortised cost. The council does not hold any financial assets that are measured at FVPL.

There are some exceptions e.g. where the council holds strategic investments to help it meet other policy objectives, such as the support of economic development in the county. With these types of investments, the purpose of the contract is not solely concerned with the payment of principal and interest (i.e. where the cash flows do not take the form of a basic debt instrument). For each of these investments a separate assessment has been made on the appropriate accounting treatment in relation to IFRS 9 for Financial Instruments.

Financial Assets Measured at Amortised Cost

Financial assets measured at amortised cost are recognised on the Balance Sheet when the council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the financial assets held by the council, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the

Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

The council has given small loans to external or voluntary organisations, but these are for trivial amounts. The council has not provided guarantees against loans they have received from financial institutions. However, the council does have deferred payment policies where individuals are allowed to defer payment against an invoice raised by the council, for example where the council holds a legal charge against a property that enable sums to be reimbursed from sale proceeds at a later date. These are similar to loans at less than market rates and are referred to as soft loans. If any of the lost interest against the soft loan was significant then adjustments would be made to the relevant service revenue account and Balance Sheet. However, the impact on the council's revenue account of soft loans and lost interest is not financially significant and the accounts have not been adjusted to reflect these requirements.

Expected Credit Loss Model

The council recognises expected credit losses on all of its financial assets held at amortised cost or FVOCI, either on a twelve month or lifetime basis. The expected credit loss model also applies to lease receivables and contract assets. Only lifetime losses are recognised for trade receivables (debtors) held by the council.

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses. Where risk has increased significantly since an instrument was initially recognised, losses are assessed on a lifetime basis. Where risk has not increased significantly or remains low, losses are assessed on the basis of twelve month expected losses.

Financial Assets Measured at Fair Value through Other Comprehensive Income (FVOCI)

The council treats assets as fair value through other comprehensive income when they are held for strategic economic development purposes rather than trading. This protects council taxpayers from movements in the value of shareholdings until such times as the shares are sold or released.

At initial recognition, an authority may make an irrevocable election to present in other comprehensive income and expenditure subsequent changes in the fair value of an investment in an equity instrument within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies. The council has chosen to apply this policy to

all such equity instruments that it holds, to designate them as assets held at fair value through other comprehensive income.

1.10. Government Grants and Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the council when there is reasonable assurance that:

- the council will comply with the conditions attached to the payments, and
- the grants or contributions will be received.

Amounts recognised as due to the council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (non-ringfenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

1.11. Interests in Companies and Other Entities

The Code requires local authorities to produce group accounts to reflect significant activities provided to council tax payers by other organisations in which an authority has an interest. The council has reviewed its interests in companies and other entities that have the nature of subsidiaries, associates and joint arrangements against the criteria for group accounts, as set out in the Code, and has concluded that there are no such material interests that require the preparation of group

accounts. In the council's own single-entity accounts, the interests in companies and other entities are recorded as financial assets at cost, less any provision for losses.

1.12. Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value, based on the amount at which the asset could be exchanged between knowledgeable parties at arm's-length. Properties are not depreciated but are revalued annually according to market conditions at the year-end.

Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the General Fund balance. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund balance. The gains and losses are therefore reversed out of the General Fund balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and the Capital Receipts Reserve.

1.13. Leases

Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification.

The County Council as Lessee

The council classifies contracts as leases based on their substance. Contracts and parts of contracts, including those described as contracts for services, are analysed to determine whether they convey the right to control the use of an identified asset, through rights both to obtain substantially all the economic benefits or service potential from that asset and to direct its use. The Code expands the scope of IFRS 16 Leases to include arrangements with nil consideration, peppercorn or nominal payments.

Initial Measurement

Leases are recognised as right-of-use assets with a corresponding liability at the date from which the leased asset is available for use (or the IFRS 16 transition date, if later). The leases are typically for fixed periods in excess of one year but may have extension options.

The council initially recognises lease liabilities measured at the present value of lease payments, discounting by applying the council's incremental borrowing rate wherever the interest rate implicit in the lease cannot be determined. Lease payments included in the measurement of the lease liability include:

- fixed payments, including in-substance fixed payments.
- variable lease payments that depend on an index or rate, initially measured using the prevailing index or rate as at the adoption date.
- amounts expected to be payable under a residual value guarantee.
- the exercise price under a purchase option that the council is reasonably certain to exercise.
- lease payments in an optional renewal period if the council is reasonably certain to exercise an extension option.
- penalties for early termination of a lease unless the council is reasonably certain not to terminate early.

The right-of-use asset is measured at the amount of the lease liability, adjusted for any prepayments made, plus any direct costs incurred to dismantle and remove the underlying asset or restore the underlying asset on the site on which it is located, less any lease incentives received. However, for peppercorn, nominal payments or nil consideration leases, the asset is measured at fair value.

Subsequent Measurement

The right-of-use asset is subsequently measured using the fair value model. The council considers the cost model to be a reasonable proxy except for:

- assets held under non-commercial leases.
- leases where rent reviews do not necessarily reflect market conditions.
- leases with terms of more than five years that do not have any provision for rent reviews.
- leases where rent reviews will be at periods of more than five years.

For these leases, the asset is carried at a revalued amount. In these financial statements, right-of-use assets held under index-linked leases have been adjusted for changes in the relevant index, while assets held under peppercorn or nil

consideration leases have been valued using market prices or rentals for equivalent land and properties.

The right-of-use asset is depreciated straight-line over the shorter period of remaining lease term and useful life of the underlying asset as at the date of adoption.

The lease liability is subsequently measured at amortised cost, using the effective interest method. The liability is remeasured when:

- there is a change in future lease payments arising from a change in index or rate.
- there is a change in the group's estimate of the amount expected to be payable under a residual value guarantee.
- the council changes its assessment of whether it will exercise a purchase, extension or termination option, or
- there is a revised in-substance fixed lease payment.

When such a remeasurement occurs, a corresponding adjustment is made to the carrying amount of the right-of-use asset, with any further adjustment required from remeasurement being recorded in the Comprehensive Income and Expenditure Statement.

Low Value and Short Lease Exemption

As permitted by the Code, the council excludes leases:

- for low-value items that cost less than £10,000 when new, provided they are not highly dependent on or integrated with other items, and
- with a term shorter than 12 months (comprising the non-cancellable period plus any extension options that the council is reasonably certain to exercise and any termination options that the council is reasonably certain not to exercise).

The County Council as Lessor

Finance Leases

Where the council grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss

on disposal (i.e. netted off against the carrying value of the asset at the time of disposal), matched by a lease (long-term debtor) asset in the Balance Sheet.

Lease rentals receivable are apportioned between:

- a charge for the acquisition of the interest in the property - applied to write down the lease debtor (together with any premiums received), and
- finance income (credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund balance to the Capital Receipts Reserve in the Movement in Reserves Statement. Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the capital receipt for the disposal of the asset is used to write down the lease debtor. At this point, the deferred capital receipts are transferred to the Capital Receipts Reserve.

The written-off value of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the Capital Adjustment Account from the General Fund balance in the Movement in Reserves Statement.

Operating Leases

Where the council grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Where there is a material cost in addition to the regular payments (e.g. there is a premium paid at the commencement of the lease or there are costs of negotiating and arranging the lease), then credits are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments.

1.14. Overheads and Support Services

The costs of overheads and support services are charged to those that benefit from the supply or service in accordance with the costing principles of the CIPFA Service

Reporting Code of Practice 2024/25 (SeRCOP). The total absorption costing principle is used - the full cost of overheads and support services are shared between users in proportion to the benefits received, with the exception of Corporate Costs. These are costs relating to the council's status as a multifunctional, democratic organisation, the cost of discretionary benefits awarded to employees retiring early and impairment losses chargeable on Assets Held for Sale.

1.15. Property, Plant and Equipment (excluding Highways Infrastructure Assets)

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment. See accounting policy 1.16 for specific provisions regarding Highways Infrastructure Assets.

Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

De-minimis Levels

The de-minimis level for capital expenditure is £10,000 and expenditure on assets below the de-minimis level is charged to the revenue account, i.e. the asset is not included in the balance sheet. The de-minimis level is not applied to expenditure which is part of an overall project costing more than the de-minimis level, expenditure that relates to specific external funding requirements or expenditure incurred by the council's maintained schools. The treatment of items below the de-minimis level in this way has no material impact on the accounts.

Measurement

Assets are initially measured at cost, comprising:

- the purchase price;
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management;

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

The council does not capitalise borrowing costs incurred whilst assets are under construction.

Donated assets are measured initially at current value. The difference between current value and any consideration paid is credited to the Taxation and Non-Specific Grant Income line of the Comprehensive Income and Expenditure Statement unless the donation has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Assets are then carried in the Balance Sheet using the following measurement bases:

- Council offices – current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV)
- School buildings – current value, but because of their specialist nature, are measured at depreciated replacement cost which is used as an estimate of current value.
- Surplus assets – the current value measurement base is fair value, estimated at highest and best use from a market participant's perspective.
- All other assets (excluding Highways Infrastructure Assets) – current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV).

Where there is no market-based evidence of current value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of current value.

For non-property assets that have short useful lives or low values (or both), depreciated historical cost basis is used as a proxy for current value.

Assets included in the Balance Sheet at current value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their current value at the year-end, but as a minimum every five years. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Comprehensive

Income and Expenditure Statement where they arise from the reversal of a loss previously charged to a service.

Where decreases in value are identified, they are accounted for as follows:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

All valuations have been undertaken by or under the supervision of a fully qualified Chartered Surveyor (MRICS – Member of the Royal Institution of Chartered Surveyors). The effective date for valuations is 1 April of the financial year and assets are revalued on a five-year rolling programme. All valuations undertaken in 2024/25 were either carried out by council staff or by suitably qualified external consultants. In addition to this rolling programme, assets which have been subject to potentially material change as a result of transactions or market conditions in any given year will be revalued as and when such changes occur.

Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired or revalued. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment or revaluation loss is recognised for the shortfall.

Where impairment or revaluation losses are identified, they are accounted for as follows:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain Community Assets) and assets that are not yet available for use (i.e. assets under construction).

Depreciation is calculated on the following bases:

- Dwellings and other buildings – straight-line allocation over the useful life of the property as estimated by the valuer up to a maximum of 50 years.
- Vehicles, plant, furniture and equipment – straight line allocation over the useful life of the asset as advised by a suitably qualified officer, mainly up to a maximum of 10 years, however, some specialised items are depreciated over periods up to 25 years.
- Surplus Assets – buildings up to 50 years, land not depreciated.

Where an item of Property, Plant and Equipment has a value greater than £5m and major components greater than 20% of the value of the asset, the components are depreciated separately at rates representative of their useful life.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Disposals and Non-current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any losses previously recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to Non-current Assets and valued at the lower of their carrying amount before they were classified as held for sale, adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Assets Held for Sale, and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for a disposal are categorised as capital receipts. The value of capital receipts is required to be credited to the Capital Receipts Reserve and can then only be used for new capital investment or set aside to reduce the council's underlying need to borrow (the capital financing requirement). Receipts are appropriated to the Reserve from the General Fund balance in the Movement in Reserves Statement.

The written-off value of disposals is not a charge against council tax, as the cost of non-current Assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund balance in the Movement in Reserves Statement.

Where a local authority maintained school converts to academy status, the carrying amount of the asset is removed from the Balance Sheet and recorded in the Comprehensive Income and Expenditure Statement as a loss on disposal at the completion of the statutory process.

1.16. Highways Infrastructure Assets

Highways infrastructure assets include carriageways, footways and cycle tracks, structures (e.g. bridges), street lighting, street furniture (e.g. illuminated traffic signals, bollards), traffic management systems and land which together form a single integrated network.

Recognition

Expenditure on the acquisition or replacement of components of the network is capitalised on an accrual basis, provided that it is probable that the future economic

benefits associated with the item will flow to the authority and the cost of the item can be measured reliably.

Measurement

Highways infrastructure assets are generally measured at depreciated historical cost. However, this is a modified form of historical cost – opening balances for highways infrastructure assets were originally recorded in balance sheets at amounts of capital undischarged for sums borrowed as at 1 April 1994, which was deemed at that time to be historical cost.

Impairment

Where impairment losses are identified, they are accounted for by the carrying amount of the asset being written down to the recoverable amount.

Depreciation

Depreciation is provided on the parts of the highways infrastructure assets that are subject to deterioration or depletion and by the systematic allocation of their depreciable amounts over their useful lives. Depreciation is charged on a straight-line basis.

Annual depreciation is the depreciation amount allocated each year.

Useful lives of the various parts of the highways network are assessed by the council's Highways Assets Senior Engineer using industry standards where applicable as follows:

- Carriageways – useful life of 40 years
- Footways and cycle tracks – useful life of 25 years
- Structures (bridges, tunnels) – useful life of 100 years
- Street lighting – useful life of 40 years
- Street furniture (bus shelters) – useful life of 25 years
- Street furniture (other assets) – useful life of 40 years
- Traffic management systems – useful life of 20 years

Disposals and derecognition

When a component of the network is disposed of or decommissioned, the carrying amount of the component in the Balance Sheet is written off to the 'Other operating expenditure' line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the

same line in the Comprehensive Income and Expenditure Statement, also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal).

The written-off amounts of disposals are not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are transferred to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

1.17. Service Concession Arrangements (Private Finance Initiative (PFI) and Similar Contracts)

PFI and similar contracts are agreements to receive services, where the responsibility for making available the property, plant and equipment needed to provide the services passes to the PFI contractor. As the council is deemed to control the services that are provided under its PFI schemes, and as ownership of the property, plant and equipment will pass to the council at the end of the contracts for no additional charge, the council carries the assets used under the contracts on its Balance Sheet as part of Property, Plant and Equipment.

Non-current Assets recognised on the Balance Sheet are revalued and depreciated in the same way as property, plant and equipment owned by the council.

The amounts payable to the PFI operators each year are analysed into five elements:

- Fair value of the services received during the year – debited to the relevant service in the Comprehensive Income and Expenditure Statement.
- Finance cost – an interest charge on the outstanding Balance Sheet liability, debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.
- Contingent rent – increases in the amount to be paid for the property arising during the contract, debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.
- Payment towards liability – applied to write down the Balance Sheet liability (the profile of write-downs is calculated using the same principles as for a finance lease).
- Lifecycle replacement costs – proportion of the amounts payable is posted to the Balance Sheet as a prepayment and then recognised as additions to Property, Plant and Equipment when the relevant works are eventually carried out.

1.18. Contingent Liabilities

A contingent liability arises where an event has taken place that gives the council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required, or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

1.19. Contingent Assets

A contingent asset arises where an event has taken place that gives the council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

1.20. Reserves

The council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund balance in the Movement in Reserves Statement so that there is no net charge against council tax for the expenditure.

Certain reserves are kept to manage the accounting processes for non-current assets, financial instruments, retirement and employee benefits and do not represent usable resources for the council - these reserves are explained in the relevant policies.

1.21. Revenue Expenditure Funded from Capital under Statue (REFCUS)

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the council has determined to meet the

cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of council tax.

1.22. Value Added Tax (VAT)

VAT payable is included as an expense only to the extent that it is not recoverable from HM Revenue and Customs. VAT receivable is excluded from income.

1.23. Schools

In line with accounting standards on group accounts and consolidation, all maintained schools in the county are now considered to be entities controlled by the council. Rather than produce group accounts the income, expenditure, assets, liabilities, reserves and cash flows of each school are recognised in the council's single entity accounts. The council has the following types of maintained schools under its control:

- Community
- Voluntary Aided
- Voluntary Controlled

Schools Non-Current Assets are recognised on the Balance Sheet where the council directly owns the assets, where the council holds the balance of control of the assets or where the school or the school Governing Body own the assets or have had rights to use the assets transferred to them.

Community schools are owned by the council and are, therefore, recognised on the Balance Sheet.

The council's Voluntary Aided and Controlled schools are owned by the respective Diocese with no formal rights to use the assets through licence arrangements passed to the School or Governing Bodies and as a result these schools are not recognised on the Balance Sheet.

1.24. Collection Fund Statement

Council Tax Income

Council tax income included in the Comprehensive Income and Expenditure Statement is the accrued income for the year. The difference between the accrued income for the year and the amount required by regulation to be credited to the General Fund will be taken to the Collection Fund Adjustment Account and included

as a reconciling item in the General Fund balance Movement in Reserves Statement. Any balances owed to or from each preceptor will be shown as a creditor or debtor in the council's accounts.

Business Rates Income

Business Rates income included in the Comprehensive Income and Expenditure Statement is the accrued income for the year. The difference between the accrued income for the year and the amount required by regulation to be credited to the General Fund will be taken to the Collection Fund Adjustment Account and included as a reconciling item in the General Fund balance Movement in Reserves Statement. Any balances owed to or from each preceptor or central government will be shown as a creditor or debtor in the council's accounts.
