

## Health and Wellbeing Board

28 January 2015

## Five Year Forward View

---

### Report of Joseph Chandy, Director of Primary Care, Partnerships and Engagement, Durham Dales, Easington and Sedgefield Clinical Commissioning Group

---

#### Purpose of the Report

1. The purpose of this report is to provide members of the Health and Wellbeing Board with an overview of the national five year forward view (5YFV) and to invite members of the Health and Wellbeing Board to contribute to the discussion and inform future board strategy alignment.
2. A presentation on the Five Year Forward View will be provided at the Health and Wellbeing Board meeting on 28th January 2015.

#### Background

3. The NHS published the Five Year Forward View document on 23 October 2014 to set out a vision for the future of the NHS: "The purpose of the Five Year Forward View is to articulate why change is needed, what that change might look like and how we can achieve it. It describes various models of care which could be provided in the future, defining the actions required at local and national level to support it."
4. There are four main themes for development in the 5YFV: getting serious about prevention, empowering patients, engaging communities and the NHS as a social movement. The following diagrams outline the key messages from these themes and any work that is being delivered locally to meet these aspirations. Moreover it begins to identify any potential gaps which may want to be considered by the CCG in terms of their future planning commitments
5. The vision sets out the need to remove barriers across providers and the various healthcare settings. It talks about networks of care centred around the patient, where care is provided closer to home where possible. It introduces seven new models of care. These are:
  - a. Multispecialty Community Providers (MCP)
  - b. Primary and Acute Care System (PACS)
  - c. Urgent and Emergency Care Networks
  - d. Viable Smaller Hospitals
  - e. Specialised Care
  - f. Modern Maternity Services

g. Enhanced Health in Care Homes

**Next Steps**

6. The National Approach is outlined below:

- The models of care detailed within the forward view will be tested on a small scale to evaluate effectiveness and then next steps taken as a result.
- Areas who have demonstrated actions towards pooling budgets with the local authority will be introduced to the concept of integrated personal commissioning (IPC) and an extension of better care fund (BCF) following evaluation of the existing BCF process and outcomes
- Forward planning the workforce requirements to meet the needs of the new models of care
- A National Information Board to be established who will publish a set of roadmaps later this year in relation to digital care i.e. developing health “apps” and bringing together audit data.

7. The Local Approach is outlined below:

- Ensuring that public health and CCG plans are aligned so that we are able to tell the story as a local health economy about those determinants of health i.e. smoking alcohol and obesity
- Continue to influence primary care in terms of their uptake delivery of prevention programmes
- Identify any financial hotspots in terms of services currently commissioned in public health and ensure contingencies are in place i.e. diabetes prevention programmes
- Develop a robust informatics strategy which reflects the work produced by the National Information Board, looking at electronic systems which support new models of care
- Review our commissioning plans in relation to the support provided for carers and specifically how we engage the voluntary sector to deliver this agenda
- Explore opportunities for further joint commissioning with the local authority
- As an organisation sign up to ‘Time to Change’
- Work with federations to agree a model of delivery and identify areas for development
- Support the federation by way of a development plan to strengthen clinical leadership and understand the contribution they can make to this radical agenda
- Revise the Primary Care Strategy and implementation plan in line with the direction of travel as and when the guidance emerges
- Review the urgent care work programme as new guidance emerges. There is a need to ensure that the urgent care strategy is aligned to the primary care strategy.

- Overall the Unit of Planning five year plan will remain the same however the detail as part of the operational plans will develop as new policy emerges and is tested.

## **Recommendations**

8. The Health and Wellbeing Board is recommended to:

- Note this report for information
- Receive a presentation on the Five Year Forward View at the Health and Wellbeing Board meeting on 28th January 2015
- Note that North Durham and DDES CCGs are working jointly in planning for the 5YFV, where indicated; an extended planning unit meeting with primary care federations and providers across County Durham is planned for 26 February 2015
- Note that North Durham and DDES CCGs have submitted an expression of interest for consideration in the proposed transformation fund for small scale testing of new models of care.
- Note that the CCGs will conduct a gap analysis to evaluate potential commissioning gaps as well as potential duplication of planning work.

## **Appendix 1: Implications**

---

### **Finance**

Implementation of strategy will in the main focus on re-configuration of existing resources to improve efficiency of resource including financial.

### **Staffing**

During the planning and implementation of the forthcoming 5YFV, reviews of existing services may take place with future options considered in some cases for alternative commissioning approaches to make best use of scarce resources which may include staff. In this event, appropriate staff consultation processes will be undertaken.

### **Risk**

No implications at this stage

### **Equality and Diversity / Public Sector Equality Duty**

No implications at this stage

### **Accommodation**

No implications at this stage

### **Crime and Disorder**

No implications at this stage

### **Human Rights**

No implications at this stage

### **Consultation**

The 5YFV is in very early stages of development and therefore engagement with all relevant commissioners and providers will be forthcoming, as indicated.

During the 5YFV planning and implementation there may be need on occasion to undertake formal public consultation. In this event relevant organisations will be responsible for ensuring due process is followed to enable effective and meaningful consultation.

### **Procurement**

Appropriate procurement advice will be sought in respect of any procurements that may be required as part of the emergent FYFV implementation.

### **Disability Issues**

No implications at this stage

### **Legal Implication**

No implications at this stage
