

## **Cabinet**

**14 December 2016**

### **Schools 20 mph Part-Time Speed Limits Project - Update Report**

---

#### **Report of Corporate Management Team**

#### **Report of Ian Thompson, Corporate Director - Regeneration and Local Services**

#### **Councillor Brian Stephens, Portfolio Holder for Neighbourhoods and Local Partnerships**

---

#### **Purpose of the Report**

1. The purpose of this report is to provide Cabinet with an update on the Schools 20 mph Part-time Speed Limits Project including details of the additional 33 schools that have been selected.

#### **Background**

2. At its meeting on 17 December 2014 Cabinet approved the Schools 20 mph Part-time Speed Limits Project which involves introducing part-time 20 mph limits on main and distributor roads around the 33 schools with the highest accident rates.
3. The objective of the project is to reduce traffic speeds around the vicinity of schools during school drop off and pick up times which will improve road safety for vulnerable road users as well as making walking and cycling to school more attractive.
4. The project includes education and awareness raising to encourage motorists to reduce their speed and encourage walking and cycling.
5. The project is funded by a one-off Public Health Grant of £952,850 and is complemented by a revenue budget to help deliver road safety education and social marketing.
6. An update report was approved by Cabinet on 11 May 2016 which highlighted that the project was progressing under budget and ahead of schedule. Cabinet approved that the underspend be used to expand the scope of the project to a further 33 schools (66 schools in total) using the revised prioritisation criteria developed in consultation with the Scrutiny 20mph Working Group.

## Original 33 Schools

7. Phase 1 (2015/16) of the project has been successfully delivered and Phase 2 (2016/17) is progressing on schedule.
8. Since the last Cabinet Update report on 11 May 2016, schemes have been successfully delivered in the Consett, Stanley, Seaham, Peterlee, Newton Aycliffe, Spennymoor and Durham areas. Each scheme has been accompanied by media releases helping to reinforce the key education and social marketing messages of the project.
9. A number of photographs from a scheme in Chester-le-Street where we were able to introduce a 20mph Zone on the main road where traffic calming was already in place are shown below:

10. Please see Appendix 2: Project Plan - Original 33 Schools for further details of progress by each school.

### Additional 33 Schools

11. All remaining 219 schools Countywide on main and distributor roads were evaluated based on the revised prioritisation criteria which has been developed in consultation with the Scrutiny 20mph Working Group. The revised prioritisation criteria is based on three risk factors:

- Collision history;
- Measured PV<sup>2</sup>; and
- Measured speeds.

Measured PV<sup>2</sup> is a measure of pedestrian risk where:

- P = Number of pedestrians; and
- V = Number of vehicles.

12. Please see Appendix 4: Revised Prioritisation Criteria for further details.
13. The 33 schools with the highest overall score under the revised prioritisation criteria have been selected and they are summarised as follows:

Ranking	School Name	Type of School	Division	Area Action Partnership
1	Neville's Cross Primary	Primary / Junior	Nevilles Cross	Durham
2	New College	College	Framwellgate/ Newton Hall	Durham
3	Framwellgate School	Secondary / 6th Form College	Framwellgate/ Newton Hall	Durham
4	Byron College	College	Peterlee West	East Durham
5	Our Lady of the Rosary RCVA Primary	Primary / Junior	Peterlee West	East Durham
6	St. Bede's RC Comprehensive & 6th Form	Secondary / 6th Form College	Peterlee West	East Durham
7	Pelton Community Primary	Primary / Junior	Pelton	Chester-le-Street & District
8	St. Joseph's RCVA Primary (Stanley)	Primary / Junior	Tanfield	Stanley
9	Framwellgate Moor Primary	Primary / Junior	Framwellgate/ Newton Hall	Durham
10	St. Leonard's Catholic School & 6 <sup>th</sup> Form	Secondary / 6th Form College	Nevilles Cross	Durham
11	Consett Academy (new site)	Secondary / 6th Form College	Consett North	Derwent Valley Partnership
12	Easington Colliery Primary	Primary / Junior	Easington	East Durham
13	Annfield Plain Junior	Primary / Junior	Annfield Plain	Stanley
14	St. Bede's Catholic School	Secondary / 6th	Lanchester	Mid Durham

	& 6th Form College	Form College		Rural West
15	Cockton Hill	Primary / Junior	Woodhouse Close	Bishop Auckland/Shildon
16	Shield Row Primary	Primary / Junior	Tanfield	Stanley
17	Teesdale School	Secondary / 6th Form College	Barnard Castle East / Barnard Castle West	Teesdale
18	Whitworth Park School + 6th Form College	Secondary / 6th Form College	Spennymoor	Spennymoor
19	Annfield Plain Infant School	Infant / Nursery	Annfield Plain	Stanley
20	Our Lady & St. Thomas RCVA Primary	Primary / Junior	Willington/Hunwick	Three Towns Partnership
21	Ropery Walk Primary	Primary / Junior	Dawdon	East Durham
22	Seaham Harbour Nursery	Infant / Nursery	Dawdon	East Durham
23	Delves Lane Primary	Primary / Junior	Delves Lane	Derwent Valley Partnership
24	Green Lane C of E Primary	Primary / Junior	Barnard Castle East/Barnard Castle West	Teesdale
25	Sacrison Primary	Primary / Junior	Sacrison	Chester-le-Street & District
26	Our Lady Star of the Sea RCVA Primary	Primary / Junior	Horden	East Durham
27	Tanfield School (Science & Engineering)	Secondary / 6th Form College	Tanfield	Stanley
28	Chester -le - Street C of E Primary	Primary / Junior	Chester-le-Street North	Chester-le-Street & District
29	Shotton Hall Academy	Secondary / 6th Form College	Passfield	East Durham
30	Shotton Hall Primary	Primary / Junior	Passfield	East Durham
31	Easington Academy	Secondary / 6th Form College	Easington	East Durham
32	Roseberry Primary	Primary / Junior	Pelton	Chester-le-Street & District
33	Willington Primary	Primary / Junior	Willington/Hunwick	Three Towns Partnership

14. Please see Appendix 5: Evaluation of Additional Schools for details of the scores.
15. The additional 33 schools are scheduled for delivery in 2017/18 and 2018/19. Please see Appendix 3: Project Plan - Additional 33 Schools for further details.

### Potential for Further Schools

16. The budget for this project has now being fully committed. However, there is potential to add further schools to the project if funding can be provided

from schools, Town/Parish Councils, AAPs or Member budgets now or in the future.

17. Members wishing to use their 2016/17 Neighbourhood Budget allocations have until 3<sup>rd</sup> February 2016 to commit funding.
18. Any Members wishing to pursue this option should contact Keith Jameson, Traffic Assets Manager, on telephone number 03000 263690 or by email at keith.jameson@durham.gov.uk
19. The Traffic Assets Team will need to survey each site to provide a fixed price estimate so Members are advised to request any estimates using 2016/17 Neighbourhood Budget by 5 January 2017. For information, the average cost of a scheme is £15,000 but the cost does vary by site depending upon the number of signs required and the presence of public utilities.
20. Members will be offered a fixed price and it is anticipated that any further schools funded by Members will be delivered in 2018/19.

### **Recommendations and Reasons**

21. It is recommended that Cabinet endorses the additional 33 schools.

### **Appendices**

- Appendix 1: Implications
- Appendix 2: Project Plan - Original 33 Schools
- Appendix 3: Project Plan - Additional 33 Schools
- Appendix 4: Revised Prioritisation Criteria
- Appendix 5: Evaluation of Additional Schools

### **Background Papers**

- Cabinet Report dated 17 December 2014
- Cabinet Report dated 11 May 2016
- Overview and Scrutiny Working Group Meeting Report dated 1 July 2015

---

**Contact: John Reed, Head of Technical Services**

**Tel: 03000 267454**

---

## **Appendix 1: Implications**

---

### **Finance**

The Schools 20 mph Part-Time Speed Limit Project is providing Council funding on a priority basis on main/distributor roads outside existing schools Countywide.

Further schemes to introduce 20 mph speed limits/zones on existing roads will need to be funded from other sources such as Area Action Partnerships, Member Neighbourhood Budgets, Town Councils, Parish Councils and Schools.

### **Staffing**

Schemes are delivered by existing staff supported by our supply chain of competitively procured contractors.

### **Risk**

There may be objections to schemes which will be considered through the consultation process.

### **Equality and Diversity / Public Sector Equality Duty**

None.

### **Accommodation**

None.

### **Crime and Disorder**

None.

### **Human Rights**

None.

### **Consultation**

All changes to speed limits need to be consulted upon and any objections to the introduction of mandatory speed limits that cannot be resolved informally will be considered by Highways Committee.

### **Procurement**

Schemes are delivered by existing staff supported by our supply chain of competitively procured contractors.

### **Disability Issues**

None.

### **Legal Implications**

The Council has the power as the local Highway Authority to introduce 20 mph speed limits and zones under the Road Traffic Regulation Act 1984 (as amended) by making Traffic Regulation Orders and where appropriate the Highways Act 1980 (as amended).

## Appendix 4: Revised Prioritisation Criteria

### Schools 20 mph Part Time Speed Limits - Revised Prioritisation Methodology for Additional Sites

June 2015

---

#### Introduction

- 1 On 17 December 2014 Cabinet approved that 20 mph part-time speed limits be introduced at 33 named schools with above average accident rates. The 33 named schools were determined using a methodology developed by a Multi-Agency Group led by Public Health based on accidents rates within a 600 metre radius of a school.
- 2 This document sets out a revised prioritisation methodology for selecting additional sites from the additional budget that has become available. It does not change the original 33 named schools approved by Cabinet in any way and these will proceed as planned.
- 3 The revised prioritisation methodology for additional sites builds upon and refines the good work undertaken by the Multi-Agency Group and where appropriate seeks to address issues raised by stakeholders with this original methodology.

#### Original Methodology

- 4 The scope includes age 0 to 16 educational establishments located on or near to main and/or distributor roads but typically referred to as 'schools'. These include:
  - Nursery / Infants;
  - Juniors / Primary;
  - Secondary / Sixth Form;
  - Private Schools; and
  - Special Needs.
- 5 The prioritisation methodology is based wholly on collision history (2008 to 2012) involving recorded child accidents aged 0 years to 19 years within a 600 metres radius of the school postcode.
- 6 The 33 schools with the highest number of collisions were selected.

#### Revised Methodology

- 7 The scope includes age 0 to 18 educational establishments (excluding the 33 named schools approved by Cabinet) located on or near to main and/or distributor roads but typically referred to as 'schools'. These include:

- Nursery / Infants;
  - Juniors / Primary;
  - Secondary / Sixth Form;
  - Colleges;
  - Private Schools; and
  - Special Needs.
- 8 The only change to scope from the Original Methodology is to include Further Education Colleges.
- 9 The original methodology was based wholly on collision history. It is important that collision history remains part of the revised methodology as it provides objective evidence of an accident trend.
- 10 Fortunately actual collision rates around schools are low and some collisions can be random in nature. As additional sites are considered with lower collision rates it is important that additional risk factors are considered to provide an objective measure of child pedestrian risk. The three risk factors in the revised methodology are as follows:
- Collision history;
  - Measured PV<sup>2</sup>; and
  - Measured speeds.
- 11 These risk factors are explained further below.

### **Collision History**

- 12 The collision history is based on the last 5 years involving all recorded collisions (child and adult) within a 200 metre radius of school entrances.
- 13 A 200 metre distance from a school entrance is used in accordance with the Department for Transport (DfT) guidance on the siting of traffic signs which typically advises that warning signs associated with schools should be sited within 100 metres of the actual hazard to be credible to the motorist and to influence motorist's behaviour.
- 14 The use of a 200 metre radius reduces the scope for collisions being included within more than one school's collision numbers. Calculating the radius from the school entrance helps ensure more accurate results.
- 15 The scores have been weighted to take into consideration vulnerable road users, casualty age and severity of injury as set out in the table below.

<b>Casualty Class</b>	<b>Score</b>
Child Pedestrian / Cycling, Fatal / Serious Accidents	6
Adult Pedestrian / Cycling, Fatal / Serious Accidents	5
Child Pedestrian / Cycling, Slight Accidents	4
Child vehicle occupant Fatal / Serious Accident	4
Adult Pedestrian / Cycling Slight Accidents	3
Adult vehicle occupant Fatal / Serious Accident	3
Child vehicle occupant Slight Accident	2

- 16 Child accidents are defined as aged 0 years to 19 years. Adult accidents are defined as ages 20 and over.
- 17 The scores take into consideration that the most vulnerable road user is a child and that one of the main objectives of the project is to reduce child accidents. Adult accidents are included as they provide objective evidence of an accident trend that poses a risk to children. In each scoring band a child accident will score +1 to the corresponding accident involving an adult.

### Measured PV<sup>2</sup>

- 18 Measured PV<sup>2</sup> provides an objective indicator of risk associated with both traffic and pedestrian flow on roads in the vicinity of a school.
- 19 Measured PV<sup>2</sup> is a risk factor used nationally for assessing the provision of School Crossing Patrols. This policy is based upon a nationally recognised standard produced by Road Safety GB entitled 'School Crossing Patrol Guidelines: June 2012'. It is endorsed and supported by the Royal Society for the Prevention of Accidents (RoSPA).
- 20 Measured PV<sup>2</sup> is a formula for assessing the conflict between pedestrians and vehicles and, from this, whether or not a School Crossing Patrol site is justified where:
- P = Number of pedestrians; and
  - V = Number of vehicles.
- 21 By counting the number of pedestrians and vehicles at peak times at the start and end of the school day, the PV<sup>2</sup> formula can be applied to determine whether or not a School Crossing Patrol meets the criteria.
- 22 The PV<sup>2</sup> calculation also takes into account a number of additional factors which affect risk, such as unaccompanied children, accompanied children, different types of vehicles, etc.

### Measured Speeds

- 23 If speeds are low then the introduction of 20 mph part time speed limits is not likely to help reduce the risk of accidents or the severity of accidents. If speeds are high then the introduction of 20 mph part time speed limits is likely to help reduce the risk of accidents or the severity of accidents. Therefore, measured speed is an objective indicator of risk based on traffic speeds.
- 24 Traffic data collection units are used to help analyse traffic speeds outside of each school. The data set used in the analysis will comprise the peak times at the start and end of the school day, when traffic speeds are being influenced by the school run, being typically 8 am to 9 am and 3 pm to 4pm.

25 The following scoring is then applied:

'Mean' Speed	Score
0-24 mph	1
25-33 mph	3
33+ mph	5

### Applying the Methodology

26 The scores are added together allowing a weighted 'Multiplier Factor' (derived from the School Crossing Patrol Guidelines June 2012') to be determined using Appendix A.

27 Therefore, using **Collision History + Speed to get the Multiplier Factor.**

28 The overall risk is then determined as:

$$\text{Measured PV}^2 \times \text{Multiplier Factor} = \text{Total Score}$$

29 Therefore the Total Score ranks the schools based upon the exposure to risk and the potential severity of injury taking into consideration mean average speeds at the start and end of the school day.

### School Rankings

30 With the methodology described above, it is possible to rank each school according to the Total Scores. For example 'School A' generated a total score of 914, being the highest priority, whereas the 'School H' generated a total score of 19, being the lowest priority as shown below.

School Name	Town	Former District	Type of School	PV2	Number of Accidents within 600m	Child Ped / Cycling, Fatal / Serious Accidents within 200m (6pts)	Child Ped / Cycling, Slight Accidents within 200m (4pts)	Adult Ped / Cycling, Fatal / Serious Accidents within 200m (5pts)	Adult Ped / Cycling, Slight Accidents within 200m (3pts)	Child vehicle occupant fatal / serious accident within 200m (4pts)	Child vehicle occupant slight accident within 200m (2pts)	Adult vehicle occupant fatal / serious accident within 200m (3pts)	Adult vehicle occupant slight accident within 200m (1pts)	Mean speed (0-24=1pts, 25-33=3pts, 33+=5pts) (average between 8-9am & 3-4pm)	Multiplier Factor	Total Score
School A	Town A	District A	Type A	88.9	31	1	1		2		1		4	27	25	914
