CQUIN 2017-2018

The tobacco CQUIN has three elements which are required to be documented in the Lifestyle and Health Factor section on Paris for every inpatient admission:

- 9a- Screening for smoking status
- 9b- Brief advice
- 9c- Referral and offer of medication/e-cigarettes

94% achieved for 2017/18

difference

together

CQUIN 2018-2019

The second year of the tobacco CQUIN is underway with excellent results to date

- 9a- Screening for smoking status – 90% target
- 9b- Brief advice – 90% target
- 9c- Referral and offer of medication/e-cigarettes – 30% target

100% achieved for Q1 & Q2 2018/19

(NHSE are now reviewing the continuation of the CQUIN for 2019/20)

PHE Report

A full evaluation of both TEWV & NTW was carried out and cascaded nationally in May 2018

Main findings:

Lots of good work so far but still challenges to work through to achieve full implementation of policy

making a

difference

together

Future Goals 2018/19

- Continue with delivery of training, especially within community service teams
- Full Policy review
- Ongoing support for AMH services to implement policy
- Greater engagement with in-patients to support cessation long term
- Revisit pathway for referrals to community services for discharge support
